Section One: Accessing the Survey

Welcome to the Tribal Budget Formulation and Unfunded Obligations Survey.

UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF INDIAN AFFAIRS
Tribal Budget Formulation & Unfunded Obligations Survey

Tribal Budget Formulation and Unfunded Obligations for FY 2019

This survey is a tool that allows the Indian Affairs' Office of Budget and Performance Management (OBPM) to reach out to tribes for their priorities and unfunded obligations. It consists of the questions and information requested in the IA FY 2019 Budget Formulation Guidelines. (Insert Link to Formulation Guidelines) This survey is comprised of two separate components.

The first section of the survey is designed to gather tribal information to formulate budget priorities and an 8% increase request from a regional level. The IA budget formulation process is lengthy and begins with this requested tribal input on priority areas for increased funding and recommendations for tribal initiatives and policies. The information gathered under the first section of the survey is used to outline individual budget recommendations at the tribal level. Each region will combine the information from all of their represented tribes and present a consolidated budget request at the Tribal Interior Budget Council National Budget Meeting.

The second section of the survey provides specific calculations that assist a tribe in determining their unfunded obligations. This information will allow us to outline the true resource needs in Indian country. If we have all tribes calculating unmet need in a consistent manner, we can develop a valid unfunded obligation report that can be presented to OMB and the Congress. It is hoped that this report will help the decision makers better understand why allowing us to only request small increases each year and pick and choose between our programs for priorities doesn't scratch the surface of our needs.

The following link will take you to the Indian Affairs Greenbook page which provides congressional budget justifications for Indian Affairs programs and performance data so you can see what the end product is for the information you provide here.

Step Two - Filling out the Indian Affairs (IA) Preferred Programs Section

You are now on the IA Preferred Programs Section of the Survey. You can select up to 10 Preferred Programs. This page provides an introduction and instructions on how to submit your Preferred Programs. (Figure 5) You can download a copy of the Tribal Budget Survey Program Descriptions [here](#).

Instructions for IA Preferred Program Increases

Preferred Programs

From the drop down menu of programs, pick the top 10 Programs that are in most need of increased funding for your tribe. List your Top Preference as No. 1 and Lowest Preference as No. 10. For each program from 1-10, include the written 'Justification' to provide support for increasing that program's funding.

You can download the Tribal Budget Survey Program Descriptions here:
<http://www.indianaffairs.gov/cs/groups/xoppn/documents/text/dc2-052409.pdf>

Justification

Please tell us about your preferred programs. For instance, why are these programs most important for your tribe? Why is Program 1 the most important to your tribe? Why are these programs more important than others at your tribe? Include what the result of increased funding would do for or to the program at the tribal/community level.

Consider using the C.A.R. model

C: Challenge. What is the challenge you are facing?

A: Action. What action could you take to address the challenge? What would happen if no action were taken?

R: Result. What would be the positive expected outcomes as a result of actions proposed? What does success look like?

Example:

Challenge: Housing needs, 28 houses are dilapidated with rotting foundations, cold air and water leaking through windows and doors, creating mold and mildew, causing hazardous living conditions affecting the health, safety and welfare of approximately 224 tribal members.

Action: Receive \$40K to \$150K average per house (\$1.12M to \$4.2M total) to repair and/or build new houses, respectively. If no action were taken, houses would continue to decay causing health, safety and wellness issues with occupants experiencing illnesses, especially youth and elderly with compromised immune systems, and potential homelessness.

Result: Improve living conditions for approximately 224 tribal members, creating safe living conditions for youth and elderly. Contracts are in place with existing vendors to expedite construction and these activities can be completed within twelve months of receiving funding, accounting for shipment of supplies to the tribe. Construction would take place immediately in May when the ground has thawed. Construction will positively contribute to the local economy by creating jobs on the Reservation/Rancheria (for every \$___ invested ___# jobs created, reference a report such as ISER's). Eliminating air leaks and rain leaks will reduce energy costs of occupants where home heating fuel is up to \$___ per gallon... (reference to PMA or DOI Strategic Plan). Furthermore, repairs and new construction will reduce illnesses and thereby reduce school absences of children and reduce medical visits to the small clinic and medical travel for hospital visits.

Reminder: Please remember not to include personally identifiable information (PII) in your responses and success stories. Some examples of PII include: information which can be used to distinguish or trace an individual's identity, such as their name, social security number, date and place of birth, mother's maiden name, biometric records, etc.

Once you have completed entering your Preferred Programs, Click NEXT (Next) to move on to the next Section.

Step Three - Filling out the Unfunded Obligations Section

You are now on the Unfunded Obligations Section of the Survey. This page provides an introduction and instructions on how to submit your Unfunded Obligations. (Figure 7)

Instructions for Unfunded Obligations

This section of the survey will allow for development of an Unfunded Obligation report that is calculated consistently across tribes. By completing the following section of the survey for all of the program lines, using the calculation standards provided, we can provide a valid and well documented outline of the need in Indian country. The resulting report can then be presented to OMB and the Congress. Please run the calculations for all of the lines included that currently do or could apply to your tribe.

NOTE: Just because you aren't currently receiving funds for a program line, it doesn't preclude you from outlining a need for funding for that program. E.g. Just because you aren't currently receiving early childhood development funding doesn't mean that you don't need an early childhood development program on your reservation. Or, just because you are a "280" state it doesn't mean that you don't need law enforcement funding to improve safety in your community.

REMEMBER:

You must use the calculations provided so that we can have consistent data to roll up and use for the report. For any line that does not have a specific calculation outlined, please provide specific detail on how you arrived at the \$ figure you entered.

TRIBAL GOVERNMENT

In 1975, the Congress enacted the Indian Self-Determination and Education Assistance Act (the Act), P.L. 93-638, as amended. The Act assured that tribes had involvement in the direction of services provided by the Federal Government in an attempt to target the delivery of such services to the needs and desires of the local communities. The Tribal Government activity endorses and constantly encourages, to the greatest extent possible, the participation of American Indian and Alaska Native tribal governments in the management and operation of programs and services formerly administered by the Federal Government.

The Loan for Service Program is designed to provide financial assistance through loans to eligible Native American degree candidates who seek employment with BIE, BIA, or a federally-recognized tribe upon graduation.
